

3 Stages

To Set Up For

Automation

Build up your financial reports, financial models and dashboards for high precision and fast delivery

Design

Define the outcome either in a precise report format or by necessary metrics

Analyse the data requirements

Prepare a model showing the end state

Deliver

Prepare deliverable meeting the design and data requirements

Set controls on the output, verify integrity

Automate

Apply the technology for recurring preparation of deliverable

Align the tasks with other business processes

Automation supported with programming or software

Instant Finance Partners

Ad-Hoc Support For Your Business

Fast We work within a timetable that is scheduled to meet your needs.

Reliable We come with a wealth of experience doing these tasks in various settings.

Efficient We use output of your systems and industry standard software to perform tasks. No costs attached for investment in systems for ad-hoc support services.
